Forecast for Wednesday 23 Jun 2021

Weather: Any early morning brightness fading as cloud increases to bring some patchy rain or drizzle, with the odd heavier bursts in the morning, the cloud lowering through the afternoon and evening.

Chance of cloud free mountain/hill tops above 800m: 90% at first falling to 70% by midday then less than 10% from mid afternoon.

Visibility: Cloud above summits in the morning then lowering to 600m in the east and 300-450m across western and central fells bringing very poor visibility. Below the cloud, good falling moderate in rain and occasionally poor in drizzle.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Rather chilly over the higher fells at first. Maximum valley temperatures around 16 Celsius in west, perhaps 18 Celsius in any brighter spells in east.

Forecast for Thursday 24 Jun 2021

Weather: Cloudy overnight and through the morning with outbreaks of mainly light rain. Becoming drier and brighter, with some sunshine, for a time through the afternoon but cloud and occasionally heavy rain returning in the evening.

Maximum wind: Westerly 10-15mph

Chance of cloud free mountain/hill tops above 800m: Little chance through the morning and again in evening, but improving to 75% for a time in the afternoon.

Visibility: Periods or persistent cloud above 300-450m in west and nearer 600m in east through the morning and again in evening, but occasional above 750m for a time through the afternoon. Away from cloud, visibility good falling to several kilometres in rain.

Temperature: **Valleys:** Plus 11 or 12 Celsius at dawn rising to a humid plus 20 or 21 Celsius by day.
At 800m: Around plus 10 Celsius
Freezing level: Well above the summits
